**August 2019 - May 2023**  
B.Tech

## Projects

### Drink Water-Web\_App

Create, Read, Update, and Delete employee data seamlessly

🔗 [https://github.com/DEV-Gitanjali/Drink\\_Water](https://github.com/DEV-Gitanjali/Drink_Water)

The Drink Water Tracker is a web-based application designed to encourage users to stay hydrated throughout the day. Built using HTML5, CSS, and Vanilla JavaScript, the application provides a visually appealing interface where users can track their water intake. By clicking on a small water glass icon, users can record the amount of water they consume, visually represented by filling up a larger water glass with fluid, accompanied by engaging animations.

### Movie\_Seat\_Booking-Web\_App

🔗 [https://github.com/DEV-Gitanjali/Movie\\_Seat\\_Booking](https://github.com/DEV-Gitanjali/Movie_Seat_Booking)

The Movie Seat Booking App is a web-based platform developed using HTML5, CSS, and Vanilla JavaScript, designed to facilitate the reservation of movie theater seats. The application features interactive elements for selecting seats, dynamically updating the display to showcase the number of seats booked, occupied, and currently selected. Engaging animations enhance the user experience, including a visually appealing animation of the big screen.
